

Why I'm Afraid to Move

As the world turns I stop

As the people around me move on

I stay still

I stay in one place because I'm too scared to move on

To leave you behind

I'm afraid that if I move on so will you

As we put you under the ground

And your spirit floats higher and higher

I stay still

I still can't believe you are gone

All the times I spent holding you close

And the hours I will spend crying

They Will never balance each other out

The years we spent and the days we lived

I will never forget the memories we made

And the love that is never gone

I may spend time with others happy memories being made

But none so happy as the ones made with you

But as I take my first step so do you

Even though I can't see you

You stay by my side and hold me in your arms

Even though I can't hold you back

FIREWORKS

I love fireworks

Maybe its because of the memory's associated with them

Or maybe its's the loud light show that lights my face up

Or maybe it's the way you can feel so free with one loud boom and a 100 little flames

They remind me of a happier time

A time where I didn't have to worry on what I wear or how I look

A time where my closest and farthest friends would come and run

A time when life that the littlest and biggest booms would light up my life

A time that made everything oh so right

I love the memories of the friendships and the bonds that were never broken cause they were swore under the little flames in the warm summer night sky

I love the traditions that were made watching the fireworks on the fourth of July

The traditions of sitting on roofs with dad or sitting on a blanket with mom counting how many at a time

The friendships that have not lasted till today but made the memories last forever

I love fireworks because of the joy they give to troubled little boys or 14 year old girls

And the funny moments they will never forget

And at the new house where I spend the night just staring out my window writing my poem remembering the times that felt

Oh so right
