CENTRAL DOCKET
REGISTRATION EPA's proposed

economic welfare of a wealthy
Multi-national company. It's
evident that Asarco is willing to
risk the health of many for
the economic gain of a few.

It's therefore EPA's public
duty to provide an "ample
Margin of Safety" under the
Federal Clean Air Act. Allowing
Asarco to emit over 215 tons
of inorganic arsenic a year under
the proposed standard is not
complying with the Clean Air Act.

Arizonic:

Joseph Patton
303 No. "G" St. # 3
Tucson, Ariz. 85703

attorneys for arsenic emissions
from the Asarco Smelters:

It is the EPA's job to protect
people from unnecessary health
hazards resulting from pollution
not to conduct a public opinion
poll in the Tucson Area regarding
this vital matter.

Since Arizonic processes high arsenic
lepus etc, it is imperative that
the densely populated area adjacent
to the smelter be protected by
stringent emission controls that
require low arsenic lepus smelters
in other areas.

The health
of Tucson & environs must be
the primary priority over the
