Mr William Ruckelshaus
Environmental Protection Agency
Washington, D.C.

Dear Sir:

I wish to protest enforcement of the regulations which would close the ASARCO Smelter in Rustin (Tacoma) Washington, putting 600 people out of work, because four (4) people per year MIGHT develop cancer due to emissions

Such action is ridiculous in the extreme, unless there is simultaneous prohibition of the use of all tobacco products in the United States, and cessation of tobacco price supports.

Sincerely yours,

Nathalie Fitzgerald
