RESOLUTION 6831

BE IT RESOLVED BY THE COUNCIL OF THE CITY OF TACOMA:

That the following communication be forwarded to the Legislature of the State of Washington:

To the Members of the State Legislature:-

By an Act of the Legislature passed in 1890, any city then or thereafter having a population of 20,000 or more inhabitants was permitted to frame a charter for its own government.

JAN 31 1919

The act conferred power upon such cities, "To authorize or prohibit the locating and constructing of any railroad or street railroad in any street, alley or public place in such city and to prescribe the terms and conditions upon which any such railroad or street railroad shall be located or constructed".

Under this law the City of Tacoma adopted a charter by a vote of its people and under this law street railway companies have applied for franchises. The franchises were granted and the terms and conditions upon which the companies were permitted to occupy and use the city streets were set forth therein.

The street railway companies some two years ago petitioned the public service commission to set aside and annul the provisions of these franchise contracts. In various forms the litigation was continued until a short time ago. The supreme court of the state held that the commission had no power to interfere with the obligations and conditions imposed in these franchises.

The street railway companies have not been slow in making their present wishes known. Before the election, at the election, and since the election, and now at Olympia they have been on the job "to protect their interests". How far their influence has been persuasive remains to be demonstrated. Just now the people of the state are looking on. They are seeing "as through a glass darkly". In a few days when pending measures come to a vote the situation will be fully revealed.

The law under which cities of the first class were organized recognized the use of their streets and the fixing of terms and conditions of occupancy and use to be local problems settled by the people themselves. After the terms have been fixed, accepted and acted upon, it is suddenly discovered, judging from the arguments advanced, that the municipalities are not only incompetent to handle their own affairs but that contracts valid when made and acted upon for a period of years should no longer be binding upon at least one of the parties to the agreement and should be set aside without the consent of the other party to the contract.

A guardian is sought for these governments which are assumed to be still in swaddling clothes altho they have been growing for more than a quarter of a century and now comprise a very large part of the population and wealth of the state.

We are not in accord with these views. These cities, in spite of the assumption to the contrary, require policies as wide, men as intelligent, and service as disinterested, as can be commanded by the state itself, and yet if the street railway companies have their way the legislature will confer upon a three man commission the power to say whether the cities can make binding contracts in relation to one of the most important subjects of municipal government.

You may suggest that the City of Tacoma modified its own contracts. Temporarily, yes. As a war measure, yes. As a patriotic service demanded by the government, yes. But the same party which consented to a temporary modification of the contracts can reinstate them again without asking any commission at Olympia for permission, unless the legislature decides that the day of local government is at an end.

Against such a policy the city council of the City of Tacoma enters a most vigorous protest. We are not willing to admit that cities of 100,000 or 200,000 or 300,000 people shall exist only in name and that their most important functions shall be supervised and controlled by commissions sitting at the capital of the state. The whole policy of local self government is involved in legislation now pending. If enacted it is but another rung in the ladder upon which have been carried beyond the reach of the people some of the most important functions of municipal government. The statute books are filled with legislation providing for appointive commissions and vast appropriations have been made to support them. State affairs, county affairs, and city affairs have been managed by appointive commissions until now rumbles of discontent can be heard from every quarter of the state. Still the process continues and the present legislature is asked to go still further in the limitation of municipal power.

Where is the interference with municipal self government to end? The decision just not rests with you. In the end it will rest with the people by direct vote if those elected to represent them fail to protect their interests. We think we are justified in requesting you to give our municipal problems most serious consideration before these measures go to a vote, and it is with this end in view that the foregoing statement is respectfully submitted.

Resolution 6845

WHEREAS, House Bill No. 310 provides for increasing the compensation of state examiners from \$8.00 per day to a rate which will be practically \$11.00 for each working day; and

WHEREAS, such increase will greatly add to the burden of the tax payers in every municipality and taxing district in the state; and

WHEREAS, such proposed increase in the tax burden would be imposed on each taxing district without the knowledge and consent of the tax payers, and without the knowledge and consent of the legislative bodies charged with the duty of levying taxes in such districts; and

WHEREAS, the procedure proposed is contrary to the fundamental principle of our government; namely, that expenditures of public moneys shall be made only upon appropriation by a legislative body; NOW, THEREFORE,

BE IT RESOLVED BY THE CITY OF TACOMA:

That we do most vehemently protest against the passage of House Bill No. 310, as an unjust burden laid upon the taxing districts of the state without their consent; and

That we urge the senators and representatives from Pierce County to use their utmost endeavor to see that this bill does not pass; and

That a copy of this resolution be sent to each senator and representative from Pierce County, and to each of the first class cities of the state.

Drury appeared in opposition to the specifications excluding concrete pipe, stating that the economic advantage of competition was thereby defeated and four important industries in Tacoma discouraged. L. Y. Stayton, a concrete manufacturer, outlined the efficiency of concrete pipe, showing samples of clay and cement pipe which had served for sewerage for ten years. He also stated that concrete pipe had been laid at Camp Lewis, passing a most severe Government inspection. Mr. Schofield, another manufacturer, defended the concrete pipe, stating that it is extensively used in many of the large cities at present. The agent for Denny Renton Clay Co. spoke of the general acceptance of vitrified clay pipe and that it has passed the test of years of service. Final action in the matter of a change in the specifications was deferred until Monday, April 7, 1919.

UNFINISHED BUSINESS

The Commissioner of Public Works presented the assessment roll for cost of improvement in Local Improvement District 1147 and the Council set June 4, 1919 as the date of hearing objections thereto.

This being the time set (by Resolution 6868) for hearing of remonstrances against the sale of Lots 5 and 6, Block 207, New Tacoma, the City Clerk reported due publication of the required notice and that no remonstrances had been filed against the sale of said property. On motion of Pettit, the City Attorney was instructed to prepare an ordinance calling for bids for said sale.

NEW BUSINESS

B. E. Buckmaster appeared before the Council, asking that the expense of paving the south end of Pacific Avenue to City Limits be shared by the City as the property cannot stand the entire cost, but that the improvement was considered very desirable. After a discussion, the Council agreed that a local improvement district should be formed and that the City's share of the cost of the improvement should not exceed 15% of the total cost, and the Commissioner of Public Works was directed to present an initial resolution covering this district.

It was decided that the Council should meet in Committee of the Whole at 2 P.M. on Thursday, May 8, 1919, to consider the various matters referred to it.

Council recessed to Thursday, May 8, 1919.

Resolution 6902

WHEREAS, the Committee of Twenty-five appointed by the Mayor under date of June 17 1919, to assist in solving the street car problem in the City of Tacoma, has made final report to the Council under date of June 10, 1919, in which recommendation is made that the company be relieved of some of the burdens now imposed, and in which it is further recommended that the Council carefully consider ways and means by which the expenses of operation and maintenance may be reduced in order that safe, sufficient and adequate service may be maintained; and

WHEREAS, it appears that the administration of our street railway system is unnecessarily complicated and expensive by reason of franchise restrictions which, at present, make impossible a union of the Tacoma Railway & Power Company and the Pacific Traction Company, and which make necessary complete separate books of account for each company; NOW, THEREFORE,

BE IT RESOLVED BY THE COUNCIL OF THE CITY OF TACOMA:

- That in order to reduce administrative and accounting expenses the Council will, upon application of the Tacoma Railway and Power Company, use the full extent of its authority to remove those franchise restrictions which make impossible the union of the Tacoma Railway & Power Company and the Pacific Traction Company; and
- That, if any further relief inconsistent with the provisions of the City Charter is desired, the Council will submit the question to the electorate and act in accordance with the wishes of the majority in such election; Provided, however, that the expense of any special election for this purpose shall be paid by the Tacoma Railway and Power Company; and
- That if the Stone and Webster interest wish to sell their transportation system to the City of Tacoma the Council will, if acceptable to the owners, submit a proposal to the people to purchase all of the Stone and Webster transportation system in and about the City of Tacoma except those lines known as the Seattle-Tacoma Interurban and the Puyallup Short Line, by assuming the outstanding bonded indebtedness of the system, which amounts in the case of the Tacoma Railway & Power Company to \$1,500,000; Provided, that the Stone and Webster interests will agree to assist the City in disposing of an additional \$1,000,000 in utility bonds for the rehabilitation of the system.

RESOLUTIONS

Resolution 8918

WHEREAS, it appears that prior to the Act of 1911 certain foreclosures for general taxes were instituted and a sale therein authorized, which in effect cut off and rendered subordinate the lien for local improvement assessments on certain property; and

WHEREAS, the records of the City show said local improvement assessments as a lien against certain property in the various districts, the same not having been cancelled of record following the proceedings taken by the County; NOW, THEREFORE,

BE IT RESOLVED BY THE COUNCIL OF THE CITY OF TACOMA:

That the City Treasurer be and he is hereby authorized to mark "Cancel by decree of the Court" all local improvement assessments shown on the records in his office wherein liens for general taxes have been foreclosed prior to the taking effect of the Act of the Legislature of 1911.

Adopted on roll call Aug. 20, 1919.
