An Ordinance entitled "An Ordinance providing for the partial grading of E Street between South Twenty First Street and the junction of Tacoma Avenue" passed by the Council on the 27th day of September 1888 was returned by the Mayor without his signature with his objections thereto as follows:

"Mayor's Office, New Tacoma, W.T. Oct 2nd 1888

To the Common Council of New Tacoma

Gentlemen

I return herewith Ordinance No 106 entitled "An Ordinance providing for the partial grading of E Street between South Twenty First Street and the junction of Tacoma Avenue" without my signature for reasons following:

Section 4 of the Ordinance reads as follows: "Upon the completion of such work in front of any lot the street Commissioner shall forthwith make out a bill against the respective owners of such lot and forthwith give the same to the City Collector who shall forthwith demand the same" etc.

Section 51, Chapter 8 of the Charter provides that the Collector "shall collect all delinquent taxes and enforce when required by warrant, and shall pay the same to the Treasurer monthly"

Section 45 same Chapter provides that the Treasurer "is receiver of taxes" etc.

Section 60 Chapter 11, confers special power upon the Collector in the matter of collection of road tax but not otherwise, and this only upon direction from the Council.

Reardsley being a quintessentially poor, this Ordinance confers upon the Collector a bonus of thirty per cent, the bills to the Collector will add to this expense materially, as he would be entitled to his percentage in addition to that allowed the Treasurer who would also handle the money and be entitled to his usual compensation therefor. For these reasons I am of opinion the ordinance in its present shape should not be approved.

I do not wish it to be understood as opposing the contemplated Street improvement and will readily sign an Ordinance for that purpose if the provisions objected to be so changed or modified as to meet the requirements of the Charter.

Respectfully submitted

An Ordinance entitled "An Ordinance providing for the partial grading of C Street between South Twenty First Street and the junction of Tacoma Avenue" passed by the Council on the 27th day of September 1883 was returned by the Mayor without his signature with his objections thereto as follows:-

Mayors Office, New Tacoma W. T. Oct 2nd 1883.

To the Common Council of New Tacoma

Gentlemen:

I return herewith Ordinance No 106 entitled "An Ordinance providing for the partial grading of C Street between South Twenty First Street and the junction of Tacoma Avenue" without my signature for reasons following:

Section 4 of the Ordinance reads as follows: "Upon the completion of such work in front of any lot the street Commissioner shall forthwith make out a bill against the respective owners of such lot and forthwith give the same to the City Collector who shall forthwith demand the same" etc.

Section 51 Chapter 8 of the Charter provides that the City Collector "shall collect all delinquent taxes and assessments when required by warrants and shall pay the same to the Treasurer monthly"

Section 45 same Chapter, provides that the Treasurer "receives of taxes" etc.

Section 60 Chapter 10, confers special powers upon the collector in the matter of collection of road tax but does not, and then only upon direction from the Council.

Besides being an unreasonable power this Ordinance confers upon the Collector I suggest that paying the bills to the Collector will add to the expense materially, as he would be entitled to his percentage in addition to that allowed the Treasurer who would also handle the money and be entitled to his usual compensation this I feel.

For these reasons, & many of opinion this ordinance in its present shape should not be approved.

I do not wish to be understood as opposing the contemplated street improvement and will cheerfully sign an Ordinance for that purpose if the provisions objected to be so changed or modified as to meet the requirements of the Charter.

Respectfully submitted

New Tacoma, Dec. 19, 1883.

"To The Honorable, The Mayor and
Common Council of New Tacoma.

I would respectfully submit the following report of surveys made for the City of New Tacoma during the year ending December 1883 or that portion of it in the present term of office.

Monuments of stone with a cross (+) drilled on the top have been placed at the intersection of the center lines of the following streets:

A Street with S. 9th to S 12th Streets inclusive.

C Street with Division Ave. to S 21st Streets inclusive

D " " " " " " " "

E " " S. 6th to " " " "

Jefferson St. with S. 21st

Tacoma Ave. with Division Ave. to 21st Street inclusive

G St " South 6th to S 21st " "

Yakima Ave " Division Ave " " " "

I St " " " " " " "

J " " " " " 19th " "

K " " " " " " " " "

Also the intersection of a line parallel to and twenty feet east of the center line of Pacific Avenue with S. 9th to S. 12th Streets inclusive.

The intersection points above mentioned were chiefly located by accurate surveys made for the Tacoma Land Company. In making said surveys a sufficient number of points of the original surveys were found to effectually guard against any material deviation from the original.

The cost of burying the monuments in the proper place was done at the expense of the city.

The following monuments were established under my supervision but at the expense of private parties. The surveys for them were made with extreme care and at great expense and being made in an official manner, and thereby in conformity with law, I report them for the purpose of giving a public record of them, and for the further protection of real property.

The most important part of the work in this department during the year has been the making of surveys for the purpose of establishing official grades on all the principal streets. Such surveys extended over the following streets, viz "A" Street to "I" street inclusive and Division Avenue to S. 19th street inclusive. The surveys were not carried quite as far as to the streets named in your instructions for the reason that where omitted street lines were not sufficiently well defined to permit of doing the work at reasonable cost. Since that time street lines have been accurately located in connection with other work enabling the city at some future time

to extend grades at light expense. In due time the surveys were reported together with profiles showing elevations along the center lines and both side lines of all streets on which it was proposed to establish grades. On the profiles were also shown proposed grade lines. In proposing these grade lines there was kept in view the general principle that where practicable streets should be so graded as to equalize "cuts" and "fills". It is thus that the total cost of grading is reduced to its lowest figure, and in case of street grading, divides the cost in nearly equal parts between the two sides of the street. The general principle was carried out in all cases except where there occurred abrupt changes in the surface of the ground, or where the grades of cross streets required a modification of the principle.

The grade lines thus submitted to your honorable body were by you carefully inspected, and with certain modifications where judgment was deemed a better guide, the grades then proposed were established by you as the official grades of this city.

The two sides of a street are to be of the same height and its center is to be one foot higher than its sides.

Such a form of cross section seems best, except in cases of street intersections, for the reason that it gives a better general appearance, causes travel to be more uniformly distributed over its surface, gives better facilities for constructing gutters of ample size, affords better opportunities for good sewer connections, and permits the operation of street railways on any part of the roadway.

When the grade of a street is very steep, its grade projects twenty feet into the street crossing it, for the purpose of lessening the rate of grade by gaining greater distance.

Surveys for establishing grades and for monuments, made within the city limits, were made by me as city surveyor. Other monuments that I have reported are within the extended limits and were officially established by me as County Surveyor.

Monuments established by me in Tacoma City are not here reported for the reason that they are reported to the Common Council of that city and are probably there on record.

Respectfully Submitted

C. O. Bean

City Surveyor.
